The Contractor shall ensure PII is used and stored in an area that is physically safe from access by unauthorized persons at all times. The Contractor agrees to safeguard PII from loss, theft, or inadvertent disclosure and, therefore, agrees to:

- A. Secure all areas of the Contractor facilities where staff assist in the administration of their program and use, disclose, or store PII.
- B. These areas shall be restricted to only allow access to authorized individuals by using one or more of the following:
  1. Properly coded key cards
  2. Authorized door keys
  3. Official identification
- C. Issue identification badges to Contractor staff.
- D. Require Contractor staff to wear these badges where PII is used, disclosed, or stored.
- E. Ensure each physical location, where PII is used, disclosed, or stored, has procedures and controls that ensure an individual who is terminated from access to the facility is promptly escorted from the facility by an authorized employee and access is revoked.
- F. Ensure there are security guards or a monitored alarm system at all times at the Contractor facilities and leased facilities where five hundred (500) or more individually identifiable PII records are used, disclosed, or stored. Video surveillance systems are recommended.
- G. Ensure data centers with servers, data storage devices, and/or critical network infrastructure involved in the use, storage, and/or processing of PII have perimeter security and physical access controls that limit access to only authorized staff. Visitors to the data center area must be escorted at all times by authorized staff.
- H. Store paper records with PII in locked spaces, such as locked file cabinets, locked file rooms, locked desks, or locked offices in facilities which are multi-use meaning that there are County and non-County functions in one building in work areas that are not securely segregated from each other. It is recommended that all PII be locked up when unattended at any time, not just within multi-use facilities.
- I. Use all reasonable measures to prevent non-authorized personnel and visitors from having access to, control of, or viewing PII.

## II. TECHNICAL SECURITY CONTROLS

- A. Workstation/Laptop Encryption. All workstations and laptops, which use, store and/or process PII, must be encrypted using a FIPS 140-2 certified algorithm 128 bit or higher, such as Advanced Encryption Standard (AES). The encryption solution must be full disk. It is encouraged, when available and when feasible, that the encryption be 256 bit.
- B. Server Security. Servers containing unencrypted PII must have sufficient administrative, physical, and technical controls in place to protect that data, based upon a risk

assessment/system security review. It is recommended to follow the guidelines documented in the latest revision of the National Institute of Standards and Technology (NIST) Special Publication (SP) 800-53, Security and Privacy Controls for Federal Information Systems and Organizations.

  - 2. There must be a documented patch management process that determines installation timeframe based on risk assessment and vendor recommendations.
  - 3. At a maximum, all applicable patches deemed as critical must be installed within thirty (30) days of vendor release. It is recommended that critical patches which are high risk be installed within seven (7) days.
  - 4. Applications and systems that cannot be patched within this time frame, due to significant operational reasons, must have compensatory controls implemented to minimize risk.
- G. User IDs and Password Controls.
  - 1. All users must be issued a unique username for accessing PII.
  - 2. Username must be promptly disabled, deleted, or the password changed upon the transfer or termination of an employee within twenty- four (24) hours. Note: Twenty-four (24) hours is defined as one (1) working day.

  - 4. Passwords must be at least eight (8) characters.
  - 5. Passwords must be a non-dictionary word.
  - 6. Passwords must not be stored in readable format on the computer or server.
  - 7. Passwords must be changed every ninety (90) days or less. It is recommended that passwords be required to be changed every sixty (60) days or less.
  - 8. Passwords must be changed if revealed or compromised.
  - 9. Passwords must be composed of characters from at least three (3) of the following four (4) groups from the standard keyboard:
    - a. Upper case letters (A-Z)
    - b. Lower case letters (a-z)
    - c. Arabic numerals (0-9)
    - d. Special characters (!, @, #, etc.)
- H. Data Destruction. When no longer needed, all PII must be cleared, purged, or destroyed consistent with NIST SP 800-88, Guidelines for Media Sanitization, such that the PII cannot

be retrieved.

- I. System Timeout. The systems providing access to PII must provide an automatic timeout, requiring re-authentication of the user session after no more than twenty (20) minutes of inactivity.
- J. Warning Banners. The systems providing access to PII must display a warning banner stating, at a minimum:
  - 1. Data is confidential;
  - 2. Systems are logged;
  - 3. System use is for business purposes only, by authorized users; and
  - 4. Users shall log off the system immediately if they do not agree with these requirements.
- K. System Logging.
  - 1. The systems which provide access to PII must maintain an automated audit trail that can identify the user or system process which initiates a request for PII, or alters PII.
  - 2. The audit trail shall:
    - a. Be date and time stamped;
    - b. Log both successful and failed accesses;

All data transmissions of PII outside of a secure internal network must be encrypted using a Federal Information Processing Standard (FIPS) 140-2 certified algorithm that is 128 bit or higher, such as Advanced Encryption Standard (AES) or Transport Layer Security (TLS). It is encouraged, when available and when feasible, that 256 bit encryption be used.
  - 2. Encryption can be end to end at the network level, or the data files containing PII can be encrypted.
  - 3. This requirement pertains to any type of PII in motion such as website access, file transfer, and email.
- N. Intrusion Prevention. All systems involved in accessing, storing, transporting, and protecting PII, which are accessible through the Internet, must be protected by an intrusion detection and prevention solution.

### III. AUDIT CONTROLS

- A. System Security Review.
  - 1. The Contractor must ensure audit control mechanisms are in place.

**Homeless Housing, Assistance, and Prevention Program Round 4 (HHAP-4)  
 Standard Agreement  
 Contract for Funds**

**EXHIBIT A**

**AUTHORITY, PURPOSE AND SCOPE OF WORK**

**1) Authority**

The State of California has established the Homeless Housing, Assistance, and Prevention Program Round 4 (“HHAP-4” or “Program”) pursuant to Chapter 6 (commencing with Health and Safety Code (HSC) section 50216) of Part 1 of Division 31 of the Health and Safety Code. (Amended by Stats. 2021, Ch. 111, Sec. 4. (AB 140) Effective July 19, 2021.)

The Program is administered by the California Interagency Council on Homelessness (“Cal ICH”) in the Business, Consumer Services and Housing Agency (“Agency”). HHAP-4 provides flexible block grant funds to Continuums of Care, large cities (population of 300,000+) and counties to build on the regional coordination created through previous Cal ICH grant funding and support local jurisdictions in their unified regional responses to reduce and end homelessness.

This Standard Agreement/Contract for Funds along with all its exhibits (“Agreement”) is entered into by Cal ICH and a Continuum of Care, a city, or a county (“Grantee”) under the authority of, and in furtherance of the purpose of, the Program. In signing this Agreement and thereby accepting this award of funds, the Grantee agrees to comply with the terms and conditions of this Agreement, and the requirements appearing in the statutory authority for the Program cited above.

**2) Purpose**

The general purpose of the Program is to (1) reduce homelessness by expanding or developing local capacity to address immediate homelessness challenges informed by a best-practices framework focused on moving homeless individuals and families into permanent housing and supporting the efforts of those individuals and families to maintain their permanent housing; and (2) continue to build on regional coordination developed through previous rounds of HHAP funding (Chapter 6 (commencing with HSC section 50216)).

This funding shall:

- a) Continue to build regional collaboration between continuums of care, counties, and cities in a given region, regardless of population, and ultimately be used to develop a unified regional response to homelessness.

HM  
 Initial Here \_\_\_\_\_

- b) Be paired strategically with other local, state, and federal funds provided to address homelessness in order to achieve maximum impact. Grantees of this funding are encouraged to reference [Putting the Funding Pieces Together: Guide to Strategic Uses of New and Recent State and Federal Funds to Prevent and End Homelessness](#) to assist in using funding strategically for their planning efforts in the delivery of services to people experiencing homelessness in the community.
- c) Be deployed with the goal of reducing the number of people experiencing homelessness in a given region through investing in long-term solutions, such as permanent housing.
- d) Include the State as an integral partner through the provision of technical assistance, sharing of best practices, and implementing an accountability framework to guide the structure of current and future state investments.
