

RECYCLED WATER AND WASTEWATER RATES

Recycled Water

The rates for recycled water are comprised of three components: a variable per acre-foot (AF) commodity rate, a fixed service charge, and a variable energy rate. Recycled water customers are billed for the commodity rate based on their monthly recycled water usage in AF and for the energy rate based on their monthly water usage in HCF. They are billed for the service charge based on the size of the recycled water meter (in inches) serving their property.

The proposed increase is due to the rising costs to purchase recycled water from outside sources, to cover the rate increases for energy necessary to treat and pump the recycled water as well as other inflationary cost increases for operations, and to repair aging infrastructure. Please see the maximum energy rates chart on page 10 of this notice by customer pressure zone for the applicable proposed rate changes.

MAXIMUM RECYCLED WATER COMMODITY RATES (\$/AF)

Service	Current Rates	Proposed Rates Effective July 1, 2024	Proposed Rates Effective January 1, 2025	Proposed Rates Effective January 1, 2026	Proposed Rates Effective January 1, 2027
Recycled Water	\$493.27	\$493.27	\$493.27	\$522.87	\$554.24

MAXIMUM RECYCLED WATER SERVICE CHARGES (\$/Meter Size)

Meter	Current Charges	Proposed Charges Effective July 1, 2024	Proposed Charges Effective January 1, 2025	Proposed Charges Effective January 1, 2026	Proposed Charges Effective January 1, 2027
3/4"	\$16.17	\$14.21	\$14.21	\$17.84	\$21.30
1"	\$17.33	\$16.85	\$16.85	\$22.40	\$27.86
1 1/2"	\$19.65	\$22.95	\$22.95	\$33.25	\$43.62
2"	\$21.96	\$29.91	\$29.91	\$45.89	\$62.18
2" Turbine	\$22.42	\$41.98	\$41.98	\$71.03	\$100.99
3"	\$26.58	\$62.17	\$62.17	\$110.04	\$159.63
4"	\$31.21	\$107.75	\$107.75	\$202.38	\$300.81
6"	\$40.45	\$165.58	\$165.58	\$316.51	\$473.69
6" Turbo/F2 Compound	\$40.45	\$198.97	\$198.97	\$387.17	\$583.34
8" or Larger	\$49.70	\$265.15	\$265.15	\$518.95	\$783.62

Wastewater

Rancho Water structures monthly wastewater service fees to recover the cost to collect, treat, and dispose of wastewater. This charge is determined on an equivalent dwelling unit (EDU) basis. One EDU equates to the quantity of wastewater an average single-family residential customer contributes to the wastewater system. The District assigns one EDU to each residential home. Commercial customer EDUs are based on their expected peak wastewater flows relative to an average single-family residential customer. If you have questions about your commercial business EDUs, please contact the Rancho Water Engineering Services Department at (951) 296-6900, ext. 4.

MAXIMUM MONTHLY WASTEWATER SERVICE FEE (\$/EDU)

All customer classes					
Service	Current Rates	Proposed Rates Effective July 1, 2024	Proposed Rates Effective January 1, 2025	Proposed Rates Effective January 1, 2026	Proposed Rates Effective January 1, 2027
Wastewater	\$46.00	\$47.38	\$47.38	\$48.81	\$50.27

This rate change is for Rancho Water wastewater customers only and is due to inflationary cost increases. Your bill will indicate if you receive wastewater service from Eastern Municipal Water District (EMWD). EMWD establishes its wastewater service fees independent of Rancho Water, even though the EMWD wastewater service fees are collected on a customer's Rancho Water bill.
