STOP MURRIE	Capital Improvement	Project <i>#</i> Title	8330 Traffic Signal Optimization/Congestion Management
	Plan Project Details	Category	Traffic Signals
JULY 1, 1991		Department	Engineering
		Asset Class	Repairs / Maintenance

**Project Description:** Modify traffic signals to optimize traffic flow. Includes operations of the master traffic signal control system, fiber optic installation, and traffic signal timing. Funding is for installation of fiber optic cable to interconnect traffic signals.

Project Status: Project is ongoing. New project scope for FY 2023/24 will be under CIP 13053.

STOP MURRIE	Capital Improvement Plan Project	Project # Title	TBD Citywide Traffic Signal Optimization/Congestion Management
	Details	Category	Traffic Signals
JOLY 1, 1991		Department	Engineering
		Asset Class	Repairs / Maintenance

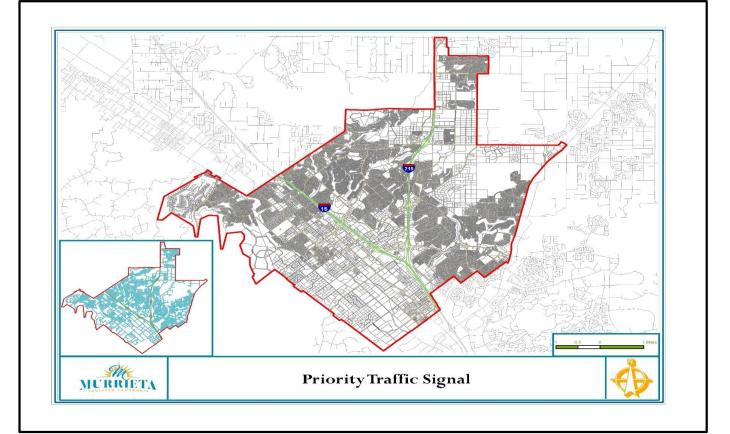

**Project Description:** Modify traffic signals to optimize traffic flow. Includes operations of the master traffic signal control system, fiber optic installation, and traffic signal timing. Funding is for installation of fiber optic cable to interconnect traffic signals.

**Project Status:** Project is ongoing. New project scope is determined each fiscal year. A projected increase of 7% yearly beginning FY 2025/26. Estimated annually increase of 4% year over year in potential future funding.

STOP MURRILE	Capital Improvement Plan Project	Project # Title	21018 Public Works Facility Expansion
	Details	Category	Buildings
JULY 1, 1991		Department	Public Works
		Asset Class	Buildings

**Project Description:** The proposed project is to purchase additional modular buildings to accommodate and expand the Public Works facility to house Park Maintenance staff from Los Alamos Sports Park. The project will be funded with Measure T continuing operations reserve funds and General Fund.

**Project Status:** Water District annexation is underway to be completed in April 2025. Final design, procurement, construction and placement of the modular offices are anticipated to be completed in the Summer of 2025.

	Improvement	Title	Library Community Room Technology
-2017 1. 199 <sup>1</sup>	Plan Project Details	Category Department Asset Class	Buildings Library Capital Asset

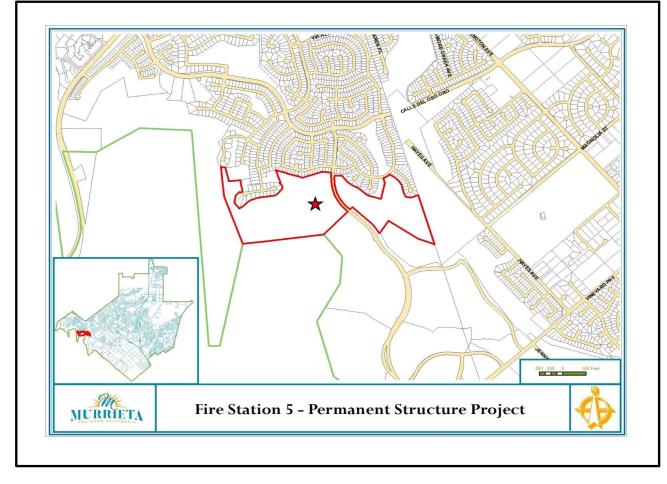

**Project Description:** This is an Audio/Visual system upgrade in the Community Room. The technology in the community room was installed in 2007 and will be 16 years old as of 2023. The system currently runs on an operating system which is no longer supported. Upgrading the technology in this room will increase accessibility.

Project Status: New project. Project to commence 7/1/2025.

<ul> <li>Project Description: Replace the temporary modular station with a permanent two-story fire station to meet the fire service compliance design of a modern station and the square footage needed to accommodate FFP growth. The project entails designing the replacement building, construction costs, temporary housing for the FFPs, and implementation planning. Fire Station 5 is a 2005 modular structure intended to be a temporary station. The 17-year-old modular building does not meet the square footage needs or modern fire station design for MFR's FFP staff.</li> <li>Project Status: Project start estimated in Fiscal Year 2027/28. Project is under Tier 2. Anticipated next steps through June 2026 is to monitor development and road networks on the west side of hte City to determine if the current site will be suitable to serve the western portion of the Cit yat build-out.</li> </ul>

20LY 1. 1991	Details	Department Asset Class	Fire Capital Asset								
will best serve the o Currently, the east	Asset Class         Capital Asset           Project Description: Fire Station 6 is in the planning stages. MFR needs to identify a parcel of land strategically located on the East side that will best serve the development growth and community needs. Approximately 3,500 homes and a shopping center are going to be developed. Currently, the east side is underserved because of long response times with no fire station nearby. CAL Fire aids in serving the east side, but with EMTs and no paramedics, which is essential for emergency medical services.										

**Project Status:** New Project. Planning is underway through June 2026 to review operational models and create an RFP for design once financial commitment has been secured, and secure the utilities for the future site. Land purchase was approved the City Council action on November 19, 2024. Estimated completion of the property purchase is in Summer 2025.
